Education

Shri Ramdeobaba College of Engineering and Management

B.Tech., Computer Science and Engineering | CGPA: 8.57(till 6th semester)

Nagpur, India

May 2027

Sakshal Pimpri College [Maharashtra Board]

Senior Secondary | 82.5%

Maharashtra, India

Feb 2023

Gurukul English School [CBSE]

Secondary | 91.6%

Maharashtra, India

Aug 2021

Skills

Languages & Backend: C, Java, JavaScript Basics, Node.js, Python, Express.js, RESTful APIs

Frontend Technologies: ReactJS, Next.js, HTML, CSS, Tailwind CSS, Material Design

Databases & Data Layers: PostgreSQL, MongoDB, SQL, Data modeling for persistence

Concepts & Tools: Android Studio, Agile Development, OOP, Data Structures & Algorithms, Git, GitHub

Experience

AyLark

Full-Stack Developer

Nagpur, India

December 2025 - March 2026

- Engineered a scalable SaaS application, building a highly responsive frontend utilizing React and Next.js.
- Developed backend logic and seamlessly integrated a PostgreSQL database, optimizing queries for secure data persistence.
- Deployed end-to-end features within an Agile cycle, managing system design, REST APIs, and full-stack testing.

Projects

InsightFlow: AI-Driven Financial Intelligence — [GitHub](#)

March 2026

Technologies: React, Tailwind CSS, Python (FastAPI), SQLite, RESTful Communication

- Developed a full-stack financial dashboard (React, FastAPI) integrated with a FinBERT NLP pipeline, reducing real-time processing time by 25%.

JointRight – Secure Live Meeting Platform — [Live Link](#)

October 2025

Technologies: Node.js, Express, React, MongoDB, JWT

- Developed a secure, full-stack live meeting platform (MERN) supporting 100+ concurrent users, featuring JWT authentication, role-based access, and end-to-end encrypted communication.

Agro - AI-Powered Agricultural Assistant — [Live Link](#)

June 2026

Technologies: ReactJS, Vite, Tailwind CSS, Gemini API

- Developed an AI-driven agricultural web platform integrating Google's Gemini API for an interactive chatbot, alongside dynamic crop disease diagnostics and multi-lingual support to assist farmers.

Achievements & Hackathons

Hackathon Excellence: Actively participated in the 24-hour HACKOVIMUM: VIBECRAFT EDITION hackathon as part of Team ModelMavericks (April 21, 2026).

Problem Solving: Solved 140+ LeetCode problems and earned 5+ HackerRank badges through consistent practice, strengthening DSA and analytical skills.

Open Source: Contributed to 11+ open-source GitHub repositories, merging 5+ pull requests to enhance functionality, code quality, and maintainability.

Research & AI: Leading research on GAN-based models for rare crop disease detection; authored/submitted papers covering LLMs and ResNet. A Journal of Soybean Price Forecasting in Maharashtra Using a Machine Learning-Based Approach is also submitted for publishment.

Certifications

[Introduction to Generative AI](#) — Duke University

October 22, 2025

[Building Generative AI-Powered Applications with Python](#)

October 25, 2025

Relevant Coursework

Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Theory of Computation, Artificial Intelligence & Machine Learning (AIML).
