Education

Shri Ramdeobaba College of Engineering and Management

B.Tech., Computer Science and Engineering | CGPA: 8.57 (till 6th semester)

Nagpur, India

Sakshal Pimpri College [Maharashtra Board]

Senior Secondary | 82.5%

May 2027

Gurukul English School [CBSE]

Secondary | 91.6%

Maharashtra, India

Feb 2023

Maharashtra, India

Aug 2021

Skills

Systems & Operations: Production Issue Triage, Root Cause Analysis, Data Accuracy Monitoring, Metrics Reporting, Documentation

Core CS Concepts: Database Management (PostgreSQL, MongoDB), Operating Systems, Computer Networks, REST APIs, GraphQL

Languages & Scripting: Python, Java, C, Node.js, SQL, Bash/Shell Scripting

Tools & Platforms: Git, GitHub, CI/CD Pipelines, Linux CLI, Web Application Architecture, Agile/JIRA Workflows

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

Experience

AyLark

Nagpur, India

Web/Android Developer Intern

December 2025 – March 2026

- Engineered a B2B SaaS platform using React, Next.js, and PostgreSQL within an Agile framework. Optimized backend database queries, integrated CI/CD pipelines for automated deployments, and coordinated cross-functional QA to track, document, and resolve production issues—ensuring timely and reliable feature delivery.

Projects

Architecture Studio – Interactive System Design Canvas — [GitHub](#)

Technologies: Next.js, NestJS, GraphQL (Apollo), Socket.IO, React Flow, Dagre, AI (Gemini)

- Built a full-stack system-design canvas (pnpm monorepo) with a drag-and-drop React Flow interface, a NestJS GraphQL API, and WebSocket-driven event-flow simulation. Implemented an AI experiment engine (Gemini) to auto-resolve architecture issues and a shared TypeScript contract layer with 100+ technology configurations.

InsightFlow – AI-Driven Financial Intelligence Dashboard — [GitHub](#)

Technologies: Python (FastAPI), React, FinBERT NLP, PostgreSQL, XGBoost

- Developed a financial data dashboard integrating a FinBERT NLP pipeline for sentiment analysis and an XGBoost prediction model. Designed RESTful APIs for bidirectional data exchange, built automated reporting metrics, and used Python scripting to reduce real-time AI processing latency by 25%.

Agro – AI-Powered Agricultural Assistant — [Live](#)

Technologies: ReactJS, Vite, Tailwind CSS, Gemini API

- Developed an AI-driven agricultural platform integrating Google's Gemini API for an interactive diagnostic chatbot, ensuring reliable API data exchange, end-user monitoring, and consistent diagnostic delivery across varied network conditions.

Achievements & Hackathons

Hackathon Excellence: Participated in the 24-hour HACKOVIUM: VIBECRAFT EDITION hackathon (Team ModelMavericks), demonstrating rapid prototyping and collaborative problem solving under rigid constraints (April 2026).

Problem Solving: Solved 140+ LeetCode problems and earned 5+ HackerRank badges, strengthening logical reasoning and algorithmic skills essential for scripting and operational troubleshooting.

Open Source Collaboration: Contributed to 11+ open-source GitHub repositories, merging 5+ pull requests—enforcing code quality, thorough documentation, and maintainability standards.

Certifications

[Introduction to Network Security](#) — University of London

April 2025

[Introduction to Generative AI](#) — Duke University

October 2025
